

Kidz Inc programmes aim to develop thinking and **problem solving skills**. Students will research and communicate appropriate knowledge, develop skills, manage risk and their resources to present their very own **enterprising outcome**.

Our Model of Learning

Kidz Inc programmes place the student at the centre of their learning situation. They will learn when they need to learn (just-in-time), and act when they need to act. This model of learning keeps them **interested** and focused on what they really want to do... **make things** and have **fun** doing it!

Venue

Kidz Inc After School Programmes operate at the school. Kidz Inc Holiday Programmes may be school based or at another venue.

NZ Curriculum

Our programmes have been developed to complement the New Zealand Curriculum taught in schools.

Providers of Quality Holiday & After School Programmes

-  Innovative and Fun
-  Hands-on Learning
-  Accessible
-  Affordable
-  Professional Facilitators

**Kidz Inc is accredited by
Child, Youth and Family**
(WINZ subsidies available)

"Kidz Inc offers a unique, project-orientated, creative holiday programme. Policies and procedures submitted by the programme meet the requirements of the current standards for approval and a site assessment demonstrated full compliance."

KIDZ INC

INNOVATIVE OUT-OF-SCHOOL EDUCATION

Now Everyone's Happy!

**Kidz Inc
is Fun!**

www.kidzinc.co.nz

**Thanks to our Quality Holiday
& After School Programmes**

When you are at work or unable to care for your child/ren during the school holidays or after school, we can give you **peace-of-mind** by providing a range of innovative and engaging programmes for your child/ren.

Kidz Inc has developed a proven portfolio of project-orientated school holiday programmes. These are designed to **stimulate, challenge** and **satisfy** with a balance of **learning** and **hands-on activities** to add value to the children's education.

Kidz Inc Unique Learning

Accelerated learning strategies, habits of mind and lateral thinking processes facilitate the necessary skills students will require to find a solution. This especially supports students with behavioural problems and students identified as being gifted or talented.

Just a brief introduction

to some of our many programmes all of which provide real skills for a real world environment. Kidz Inc introduce **fun** and **enthusiasm** into learning that kids thrive on!

Activities are divided into **juniors** aged 5 to 8 and **seniors** aged 9 to 14 years.

They will develop personal and social skills such as:

- Creativity
- Decision-making
- Empowerment & Confidence
- Building Friendships
- Individuality
- Responsibility

All our Activities

focus on developing knowledge and decision-making skills. Students will create choices, acquire skills, manage time and resources.

Kidz Inc Innovative Outcomes

The efforts of the students are directed towards creative, innovative and most of all real-life outcomes.

Kidz Inc Enterprise Focus

These projects encourage students to work collaboratively to design, construct and present a product or a service. These outcomes, in the true spirit of enterprise, are showcased and can benefit the wider school community.

Kidz Inc Sustainability Principles

Within these learning experiences, the students are guided by key aspects of Environmental Education, such as waste reduction, energy conservation and cradle-to-cradle product and service design.

Projects

We cover a wide range such as: kitemaking, electronics, ceramics, puppetmaking, cooking, musical instruments, bubble wands, robotics, leatherwork, juggling sticks, enamelling, jewellery and digital film making.
